## # Projects

### Bruinwalk Django/JavaScript

[bruinwalk.com](https://bruinwalk.com)

- A website to review professors at UCLA, used by thousands of students every quarter

### Jumping Jarvis React/Python

[github.com/jc65536/gunnhacks-project](https://github.com/jc65536/gunnhacks-project)

- An exercise app that uses the TensorFlow OpenPose model to count workouts
- Implements basic user authentication

### TRAINER Expo/Python

[github.com/Pranav-Chati/CincyHacks](https://github.com/Pranav-Chati/CincyHacks)

- Similar to Jumping Jarvis, but it's an Android app developed using the Expo framework

### phbot Java

[github.com/jc65536/phbot](https://github.com/jc65536/phbot)

- A Discord bot made using Discord4J that integrates with the Google Classroom API
